## Professional interests:

Being responsible of large entities in manufacturing environment, efficiency and process improvement and optimization by operation stabilization, Lean methods and statistical data analysis. Complete business efficiency development. R&D and technical oriented mindset in all actions as only decisions based on facts about whole business is important.

## Experience and personal properties:

18-year experience of Quality and Operational Management and Development, including over 9 years in Asia (China) of which over 3.5 years as GM in transformer and choke manufacturing company as the only non-Chinese. Strong technical mindset. Determined, patient and capable of taking big responsibility. Very good English.

## Motto:

"Quality and fresh air have one thing in common: both remove stress when breathed."
